Just Water, But It Is So Powerful
Super Alkaline Ionized Water – Powerfully Clean, Sanitize & Deodorize.

**UNI-FLOW**

**UF-15α**

*Produces pH12.5 15L Alkaline Ionized Water continuously every hour.*

**UF-15α Features**

- Produces only alkaline water and generates no acid water.
- Does not generate chlorine gas during operation.
- By operating pH control valve, pH10.5 ~ pH12.5 SAIW can be obtained to your necessity.
- Easy operation by anybody.
- Charging POCA is automatically instructed on touch-panel.
- Easy charging of POCA through a slit on top of machine.
- Smallest and lightest ever and can be installed safely anywhere with small space.
- Body of stainless steel combined with high quality plastic is non-corrosive and rust free.
- Replacement of electrode cell, suspension of water supply or any other abnormal conditions of machine will be indicated on the touch panel.

1. Slit to feed POCA
2. Operation Touch Panel
3. pH Adjustment Valve
4. SAIW Dispenser

**POCA (K₂CO₃)**

High quality potassium carbonate is compressed in 100g round cake. Non-powder form allows easy and clean handling.

**OPTIONS**

**Pure Water Generator**

Tap water must be the source of water to be used and calcium contained in the tap water will affect ionizing function and must be removed before tap water is fed into the machine.

**Water Softening Filter**

Either Water Softening Filter or RO (Reverse Osmosis Membrane Filter) Machine, or combination of both is strongly recommended to install together with UF-15α depending on the water quality of the location where UF-15α is used.
